SUMMARY

Engineering leader with 15+ years engineering experience, including 4+ years leading high-performing remote teams. Transforms struggling teams through trust and technical excellence while strategically leveraging AI for management and technical work. Proven ability to navigate organizational complexity and build sustainable processes. Leads full-stack teams with commitment to accessibility and sustainable practices.

PROFESSIONAL EXPERIENCE

TRAVELERS INSURANCE | Engineering Manager | April - Nov 2025

Led engineering team through major organizational transition following acquisition, navigating shift from small startup to enterprise environment while building a customer portal and supporting risk management services.

- Inherited team previously without management structure for 4 months; quickly established processes that enabled consistent delivery during post-acquisition integration.
- Led successful SFMC migration with minimal direction; team recognized by leadership as fastest to complete training and apply it effectively despite tight timeline
- Leveraged AI to synthesize feedback patterns and accelerate understanding of unfamiliar insurance domain and tech stack (Elm, Elixir)
- Protected engineering capacity by navigating complex enterprise bureaucracy as team representative in cross-functional meetings

TRUSS | Multiple roles | 2020 - 2025

Led distributed teams and managed engineers building full-stack web-based applications for US government clients

ENGINEERING MANAGER | June 2022 - April 2025

DIRECT FILE IMPACT

- Contributed to IRS Direct File launch serving 140,000 Americans in 2024 pilot, with successful expansion to 32 million taxpayers in 2025
- Stayed technically engaged through IC contributions to Direct File, architectural review, built reliable features and robust testing practices during the pilot phase to ensure a smooth launch for taxpayers

LEADERSHIP IMPACT

- Transformed a team from struggling to stellar in 4 months by rebuilding trust, empowering engineers, and creating space for open communication
- Developed discovery framework and culture of psychological safety that led to more predictable delivery
- Recognized as company resource on effective AI usage; delivered company-wide presentation on leveraging AI as collaboration tool for engineering teams

PEOPLE MANAGEMENT

- Supported and mentored multiple engineers through targeted skill development and stretch opportunities, directly resulting in two promotions to Senior level
- Developed crisis support frameworks and the company's first structured PIP process, creating tools used by managers across the organization

SR SOFTWARE ENGINEER & SOFTWARE ENGINEER III | Nov 2020 - March 2022

- Boosted frontend test coverage by 40% while making tests more reliable and easier to maintain
- Successfully championed migration to React Testing Library, improving developer experience

LAB ZERO INNOVATIONS | Software Engineer | 2017 - 2020

- Established frontend best practices and toolsets that improved team consistency and development velocity for Fortune 10 clients
- Advocated for and implemented accessibility improvements that aligned with client compliance requirements and strengthened code quality

SOORYEN TECHNOLOGIES | Sr Frontend Developer | 2014 - 2017

- As Tech Lead and Architect, led Web Payments API implementation, streamlining customer checkout and improving conversion rates for major e-commerce brands
- Managed the Bloomreach partnership, optimizing search and conversion metrics for top 100 e-commerce merchants

SUPPLEMENTAL EXPERIENCE

LUNA STATION QUARTERLY | Founder & Editor-In-Chief | 2010 - Present

- Built and scaled award-winning publication from inception, growing distributed team to 15+ editors across multiple time zones
- Improved operational efficiency and content quality through strategic process automation and documentation systems
